# Brown County, Ohio – Corn Data

| Year | Yield | Price |
|------|-------|-------|
| 1997 | 103.5 | 2.48  |
| 1998 | 119.4 | 2.03  |
| 1999 | 101.3 | 1.89  |
| 2000 | 152.9 | 1.90  |
| 2001 | 125.3 | 2.00  |
| 2002 | 89.2  | 2.48  |
| 2003 | 120.9 | 2.45  |
| 2004 | 149.6 | 2.04  |
| 2005 | 139.5 | 1.98  |
| 2006 | 146.5 | 3.08  |
| 2007 | 134.3 | 4.29  |
| 2008 | 124.0 | 4.21  |
| 2009 | 172.7 | 3.55  |
| 2010 | 141.2 | 5.45  |
| 2011 | 149.7 | 6.44  |
| 2012 | 123.8 | 7.09  |
| 2013 | 172.6 | 4.41  |
| 2014 | 171.3 | 3.78  |
| 2015 | 182.9 | 3.89  |
| 2016 | 170.6 | 3.61  |
| 2017 | 174.4 | 3.55  |

|         |       |      |
|---------|-------|------|
| Average | 141.2 | 3.50 |
|---------|-------|------|

- The data for county level yields and prices for Brown County, Ohio are presented in Table 1.
- The farmer of interest (Professor Moss's Uncle-in-Law) has 2,560 of farmland historically planted to corn and soybeans. The basis is 45 % corn (1,152 acres) and the base yield established in 2009 with the change in farm program (i.e., FSRI 2002 to the 2008 Farm Bill) was 140.5 bu./acre.
- In addition, the Reference price for corn is \$ 3.70/bu and the loan rate is \$ 1.95/bu.
- The expected price received this year (the MYA) is \$ 3.35/bu.

# Questions 1 and 2

1. The price used to compute the Agricultural Risk Coverage Payoff is
  - a \$ 3.76 /bu.
  - b \$ 3.50 /bu.
  - c \$ 3.85 /bu.
  - d Cannot determine
2. The Agricultural Risk Coverage Payoff for this farm (assuming ARC-IC) and a recent proven yield of 167.32 bu./acre would be
  - a \$ 632.02
  - b \$ 488.21
  - c \$ 542.67
  - d None of the above.

## Question 3 and 4

3. Assume that the market year price for corn this year is \$ 3.35/bu, what is the Price Loss Coverage received by this farm for corn?
- a \$ 56,650
  - b \$ 57,344
  - c \$ 48,152
  - d None of the above
4. The maximum price difference for Price Loss Coverage program is
- a The Reference Price minus the Market Year Price
  - b The Reference price minus the Loan Rate
  - c The Market Year Price minus the Loan Rate
  - d None of the above.

# Yield/Price Probabilities

| Obs | Yield  | Price | Prob(Y,p) | Obs | Yield  | Price | Prob(Y,p) |
|-----|--------|-------|-----------|-----|--------|-------|-----------|
| 1   | 116.79 | 1.87  | 0.00001   | 29  | 116.79 | 4.66  | 0.01401   |
| 2   | 126.29 | 1.87  | 0.00009   | 30  | 126.29 | 4.66  | 0.05110   |
| 3   | 150.02 | 1.87  | 0.00369   | 31  | 150.02 | 4.66  | 0.31873   |
| 4   | 164.26 | 1.87  | 0.01314   | 32  | 164.26 | 4.66  | 0.36460   |
| 5   | 178.50 | 1.87  | 0.02270   | 33  | 178.50 | 4.66  | 0.20242   |
| 6   | 202.23 | 1.87  | 0.01132   | 34  | 202.23 | 4.66  | 0.01523   |
| 7   | 211.72 | 1.87  | 0.00489   | 35  | 211.72 | 4.66  | 0.00308   |
| 8   | 116.79 | 2.43  | 0.00010   | 36  | 116.79 | 5.22  | 0.02064   |
| 9   | 126.29 | 2.43  | 0.00065   | 37  | 126.29 | 5.22  | 0.06474   |
| 10  | 150.02 | 2.43  | 0.01853   | 38  | 150.02 | 5.22  | 0.27659   |
| 11  | 164.26 | 2.43  | 0.05254   | 39  | 164.26 | 5.22  | 0.25214   |
| 12  | 178.50 | 2.43  | 0.07232   | 40  | 178.50 | 5.22  | 0.11156   |
| 13  | 202.23 | 2.43  | 0.02471   | 41  | 202.23 | 5.22  | 0.00575   |
| 14  | 211.72 | 2.43  | 0.00917   | 42  | 211.72 | 5.22  | 0.00100   |
| 15  | 116.79 | 3.54  | 0.00235   | 43  | 116.79 | 5.78  | 0.02181   |
| 16  | 126.29 | 3.54  | 0.01158   | 44  | 126.29 | 5.78  | 0.05880   |
| 17  | 150.02 | 3.54  | 0.15394   | 45  | 150.02 | 5.78  | 0.17208   |
| 18  | 164.26 | 3.54  | 0.27727   | 46  | 164.26 | 5.78  | 0.12501   |
| 19  | 178.50 | 3.54  | 0.24239   | 47  | 178.50 | 5.78  | 0.04408   |
| 20  | 202.23 | 3.54  | 0.03886   | 48  | 202.23 | 5.78  | 0.00156   |
| 21  | 211.72 | 3.54  | 0.01065   | 49  | 211.72 | 5.78  | 0.00023   |
| 22  | 116.79 | 4.10  | 0.00679   | 50  | 116.79 | 6.33  | 0.01656   |
| 23  | 126.29 | 4.10  | 0.02884   | 51  | 126.29 | 6.33  | 0.03837   |
| 24  | 150.02 | 4.10  | 0.26255   | 52  | 150.02 | 6.33  | 0.07691   |
| 25  | 164.26 | 4.10  | 0.37686   | 53  | 164.26 | 6.33  | 0.04453   |
| 26  | 178.50 | 4.10  | 0.26255   | 54  | 178.50 | 6.33  | 0.01251   |
| 27  | 202.23 | 4.10  | 0.02884   | 55  | 202.23 | 6.33  | 0.00030   |
| 28  | 211.72 | 4.10  | 0.00679   | 56  | 211.72 | 6.33  | 0.00004   |

## Questions 5, 6 and 7

5. Assume that the proven average yield is 167.82 bu./acre.  
Given a price of \$ 3.76 /bu, what is the actuarially fair price of a 80 % yield coverage policy?
6. Assuming 80 % yield coverage and a contract price of \$ 3.50, what would the actuarially fair price of revenue protection be?
7. In issuing insurance the “load” is
  - a The cost of writing policies, paying claims, and other business cost.
  - b Increased input use by farmers attempting to game the insurance policy.
  - c The concept that farmers with lower expected yields and/or higher risk tend to remain in the pool as the insurer increases the premium.
  - d None of the above.

## Questions 8 and 9

8. Reinsurance of multi-peril crop insurance in the United States is
- a Administered by the Risk Management Agency of the United States Department of Agriculture.
  - b Operates by private insurance companies placing insurance policies into one of two funds: the Assigned Risk Fund and the Commercial Fund.
  - c The payoff to the insurance company varies by the state the insurance policy is written in.
  - d All of the above
9. In general reinsurance allows crop insures to
- a Obtain profits by leveraging their position.
  - b Reduce the potential loss by diversifying risk across regions.
  - c Was issued by Lloyds of London.
  - d None of the above.

# Question 10

10. Of the current agricultural policies, the policy(s) that tend to be price distorting are
- a Price Loss Coverage
  - b Agricultural Risk Coverage
  - c Crop Insurance
  - d b and c
